ADVANCING SCIENCE

MISSION STATEMENT

OUR VISION

Players in science and innovation have reliable access to all digital information and tools relevant to them – anytime and anywhere.
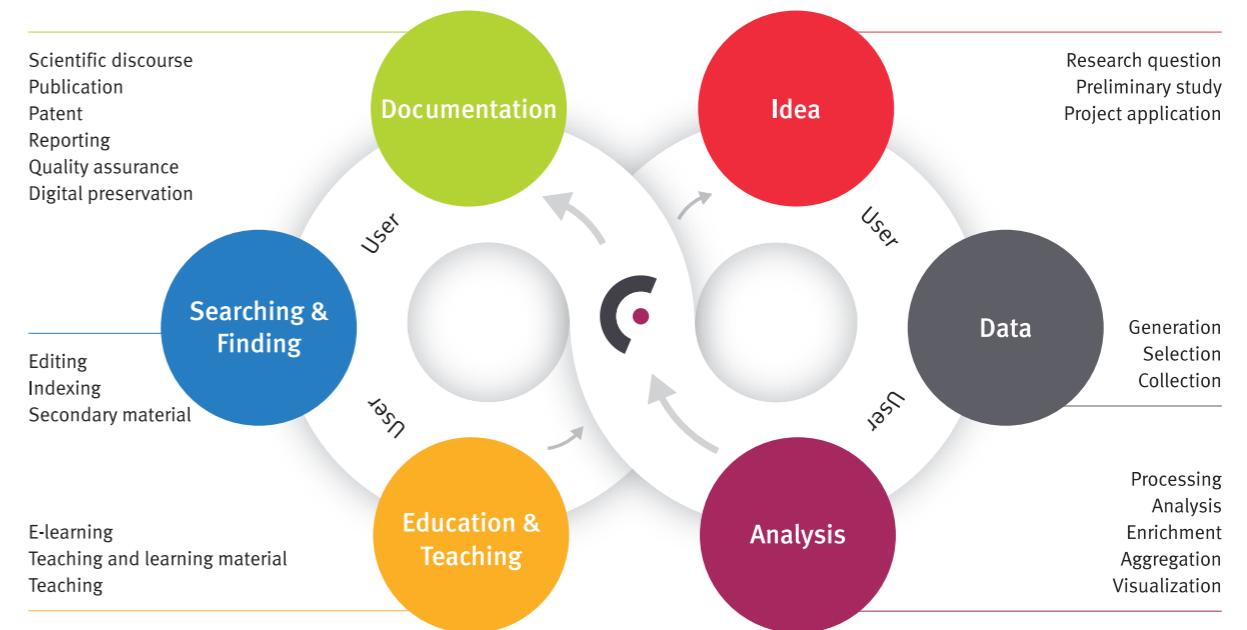

OUR
MISSION

We research, develop and operate
methods, processes and services for a
sustainable information infrastructure.

We offer data, information and
knowledge, software and services via
open and legally compliant platforms.

We make them searchable, accessible,
interoperable and reusable.

We support the value creation process
in science and innovation at all levels.

We make it possible to answer research questions
and ask new ones. In doing so, we follow our
guiding principle »Advancing Science«.

We are committed to equal opportunities and actively support the further development of our employees as well as work-life balance and safe working environments.

We treat the environment and its resources with care.

INTEGRITY
INTEGRITY ENSURES OUR CREDIBILITY BOTH WITHIN AND OUTSIDE OF OUR ORGANIZATION

As an institute with a public mission we are committed to neutrality.

We follow the rules of good scientific practice.

We apply the Public Corporate Governance Codex of the Federal Republic of Germany and the Federal State of Baden-Württemberg.

QUALITY

MEANS FOR US MUTUAL RESPECT AND TRUST, FAIRNESS AND RECOGNITION

We meet our partners and users at eye level.

We cultivate a corporate culture that respects and values people in all their diversity.

We create trust and reliability through transparency.

Together, we strive for improvement and give ourselves
the freedom to develop further.
